

FP-30 GENERAL

AUTOMATIC FIRE EXTINGUISHING SYSTEM

KEY FEATURES

- FP-30 GENERAL is a compact automatic fire extinguishing system which can protect 2 zones separately. In addition the third loop can be used for extra detection.
- Different fire detectors such as heat, rise of heat (DM), smoke and flame detectors can be used in the system. These are chosen according to the application.
- Best possible extinguishant such as Safeguard-water mist, FM200 or CO2 gases will be used according to the application in question.
- System includes several programmable features such as release delay, engine stop, ventilation stop, supply voltage control, etc.
- Reliable, effective and high-quality fire detection, alarm & extinguishing system.
